 - C# Programming
 - Photography
 - Website/Domain Management
 - Static website Programming (HTML, CSS)
 - Python Programming
 - Robotics/Arduino
 - CAD (3D Modelling) in FreeCAD
-

PERSONAL SKILLS

Self-Management

My schooling has been the main factor in the development of this skill in me, not only in the day-to-day of getting to school on time and with the correct gear but also in my role as Photographer and Group representative in a school council.

Problem Solving

My ability to problem solve is largely rooted in my hobbies of programming and robotics/electronics, both of these hobbies have helped to develop an ability to commit to solving a problem.

Time management

School and especially NCEA taught me the importance and necessity of time management.

COMMUNITY & VOLUNTEER EXPERIENCE

Gleniti Baptist Church

Timaru, New Zealand

Feb 2016 - Present

● Computer Technician

This is a volunteer position that involves operating a computer that is used to display information such as song lyrics during live events.
